

## Service Pro Antifreeze/Coolant Label Changes

Upon the depletion of current inventories, the Service Pro antifreeze/coolant will be labeled and marketed as Service Pro “All Makes-All Models, Universal Formula.” AIOD has performed extensive trademark research in order to utilize the revised brand name. Below is an image of the new labels. The labels have changed very little in order to continue the brand recognition and communicate the product performance.

The Service Pro All Makes-All Models, Universal Formula is compatible with any antifreeze/coolant used in all domestic and foreign car and light-duty truck cooling systems. In fact, it is designed to add to or replace any color antifreeze/coolant. Additionally, it may be used in a diesel automotive or heavy-duty application when combined with an appropriate supplemental coolant additive. The coolant meets ASTM D3306 and D4985.

Please contact your Universal Salesperson or Technical Services Department if you have any questions concerning coolant use.
